## What's New in the?

LittleOne is a keyboard, pad and sound module designed for both audio recording and the creation of your own signature sound. It has been designed to be easy to use with many different software synths. Keyboard LittleOne is a true analog synthesizer with an arpeggiator, extensive modulation capabilities and a dynamic sound section. The 16 button keyboard is arpeggiator and can be triggered by MIDI note on. The keyboard and panel can be fully customized through an included layout editor with all of the 16 keys on one side and the 64 outputs on the other. The keyboard is fully MIDI controllable with all key velocity and aftertouch messages. Every button can be set to an audio routing effect (filter, chorus, delay etc) to reinforce its sound. LittleOne works with most digital software synthesizers. Pad LittleOne has 64 pads that behave in a similar way to a multisampled drum kit. The pads can be set to any effect (delay, chorus, filter, etc) through its "drumkit" section which has a multimode filter. The drumkit section can also be triggered by MIDI note on. All 64 pads can have a segment that is mirrored to make a 16 step effect section that has almost infinite control. Every pad can be set to any effect through its "drumkit" section (filter, chorus, delay, vibrato, tremolo). The final effect of each pad can be selected from a bank of effects, one to six effects. These effects are also fully MIDI controllable. Slap modules Each of the 16 pads is also a sound module that has more than 20 multisampled modulation effects, 48 presets and a full arpeggiator. The slap modules affect the sound of the pads and it can be easily used in any sound you want. How to Choose an Analogue Synthesizer?: Actually, that depends on a number of factors: from which country you are? How much do you wish to spend? What do you plan to do with it? And the list goes on! Even though, most of you out there would probably have already narrowed down, we are going to give you a few tips on how you can make this an easy decision for yourself.
