If Super Mario 3 and Braid had a baby, this game would be it LOL....Dodge the madbro clouds of firey doom, jump over the buzz saws of death, and flying\gliding through death traps...this game is pretty cool. (ps - don't fall in the lava XD). This is a rather unique yet rather simple puzzle game and was really relaxing in a way. The puzzles the futhur you got in required a little more thought.

Good at puzzle games? This might be easy or too easy all the way through.

Don't play puzzle games all too much? Give it a try, you'll like the first handful but if you're like me the last few especially try to distract you but you'll get it.

Great yet simple graphics - worth the price.. Ive played an hour of the game so far... There is some issues with audio as it sometimes crackles. Oddly for me it dissapears in somd instances. As for people reporting that the game does not work on windows 10, im on the operating system myself and i have not encountered any crashing. If you have a thing for war related games and/or you had the game on ps2, i would reccomend.. One of the most polished match-3 shooters I've played. Nice visuals, entertaining earworm sounds--everything you need to happily waste hours of time.. I got this and the other game in a bundle. Intended to play for just under 2 hours but ended up not realizing I'd spent 4 just exploring. Early impressions are it's an absolutely gorgeous game that no one plays. I think a positive review is fitting because even without doing anything but harvesting and crafting i still enjoyed doing it in such a beautiful woodlands and will be doing more. Hopefully they can resume developing it when circumstances change.. Let\u2019s talk about platformers. My favorite of all time is Super Mario 2. It gave you the option to pick one of four characters, each of whom had different abilities. If you chose the correct one, you got through the level a lot easier than if you chose poorly. In Three Dead Zed, you not only get to swap characters, you get to do it mid-level! It becomes not only necessary to choose the right Zombie, but it also becomes a skill one must master in order to proceed further into the game. Not only is this ingenious, it\u2019s a hell of a lot of fun!

The puzzles increase in complexity and difficulty as you progress (Which is what you would expect), and it keeps you entertained. I especially love how a nice splatter of your former self remains after you die and are reborn to try the level again.

The Controls are great if you have a controller. Xbox360 recommended, but if you are familiar with playing FPS games on a keyboard, you won\u2019t find any difficulty here. The controls are mapped out in a good way and you can change them if you like. I switched it to Minecraft controls and found it was easier to go with the defaults so I switched back.

The Artwork is amazing! I love the zombies and the detail that went into the animations of the game. The background animations and static images are well placed and look great. I don\u2019t know much about the difficulty in lighting games, but the shadows and lighting seemed to be really well done. This helped to provide a really enjoyable and differing environment throughout my gameplay.

The sound effects are well suited for the game and can be quite funny at times. The music is similar to 8-bit gaming, which rings my nostalgia bell so I enjoyed that as well.

3DZ is a lot of fun and adds something new to both the platformer and zombie genre\u2026 which in this day and age, is something to admire. Three types of zombies means three times the fun! If you are a fan of zombie stuff, get the game! If you are a fan of platformers, get the game! And if you are a fan of both, why haven\u2019t you already gotten the game?

. I checked the title and I'm pretty sure this said horror. Bland is I can say. no frights and story weak.. Good Game, Bad Net Code. If you want to play online (which is pretty much EVERYONE) dont buy the PC version of the game unless they fix the net code (which they say they are going to but I doubt it).. Was able to run it without any issues, but I'm sure there's an easy fix if I had any. Great game. I like the graphics on it better than Caesar 3, but I do love them both equally for different reasons. I still have the disks for this packed up in my stuff somewhere, but they're completely destroyed. Was heartbroken I couldn't play it anymore. Bought it as soon as I spotted it on Steam.

Oh man, this is really bad. Menu bar says "SUPERDITRO" -- and right away that's a really bad sign.

The developer seems to be working on the game still -- so credit where it's due there... but this really should be called Early Access if it needs that much work.

The pixel perfect jumps early into stage one, where you're under enemy fire you cannot stop, when you cannot adjust your character's velocity to increase jump radius.... just, no.

There is a difference between ragequitting and "f*ck this".

I'll revisit this game. A very visually pleasing game with a great story. One of the best sound designs EVER! 10/10 IGN. I bought this thinking it would work with GameMaker, you know, maybe the 2nd most popular game creation tool after Unity, but nope, you can get a buggy addon that gives you randomly working projects or not. It's frustrating as I'm sure it would be a great tool but it's lack of support across the platforms worries me, Spine2d supports everything, I understand it's a smaller team but for £45 you would expect it to work with common game creation tools.. This game is not worth it.

Now don't get me wrong, I understand the humor behind this developer's games. I own Gay World and President Trump The Way In Uganda. So, I'm not gonna review the theme, but the gameplay.

It took about 5 minutes for the game to load. After that, the game was slow, but I managed to pull through. But then I found the enemies. The enemies look like The Rake, but they don't do anything. They can deal damage, but you can beat the game without killing them. Literally. They do not go towards you, like a normal enemy. All they do is just stand there. The only way to get damaged is to walk right in front of it. Oh yea, the game acts like it's a big deal that you have 99/100 health. You hear a heartbeat noise throughout the entire game.

Now you can see why this isn't worth your money.. Oh how we played this Novalogic game back in the late 90's. The Voxel graphics, the birds circling over the battlefield - were usually the first to die. The colleague of mine shooting me in the back. The AI shooting through walls. Overall it was fun, the graphics are severely dated, the AI is ancient and would only be good today for giving general directions in a GPS, but playing DF with friends in a LAN or internet was always fun. TBH, I just bought this and DF2 for sentimental reasons, and not because they are great shooters or anything. DFLW wasn't as much fun though.
